Instructions

- 1. Duration: 1 hour.
- 2. 1 point for each correct answer, -1 point for incorrect guesses. (Guesses are identified at the marker's discretion; basically we want to discourage writing " π " for each integral that you can't figure out.)
- 3. Materials allowed are pens, pencils, and the TI-30XB "green" calculator (preferred) or an equivalent non-programmable calculator. We'll supply paper for rough working.
- 4. All integrals will be supplied as definite integrals, and on your solution sheet you must write your answers as numerical values which are accurate to at least 6 decimal places.
- 5. In the event of papers achieving the same score, the tie-breaker will be the order of submission, with earlier papers ranked higher.
